

It's the last week of the year!

English and Maths:

If you want to continue with the Hamilton Trust lessons, they are at:

<https://www.hamilton-trust.org.uk/blog/learning-homepacks/>

You are onto Week 13 for the Maths and Week 14 for the English.

The BBC site is also delivering lessons in Maths, English and other subjects on a daily basis:

<https://www.bbc.co.uk/bitesize/tags/zncsscw/year-6-and-p7-lessons>

Reading:

Books for Topics has produced a lovely Summer Reading Bingo challenge:

<https://www.booksfortopics.com/bingo>

See how many you can complete! The site also contains suggestions for some fabulous books to read over the holiday.

Art and Design:

Design your own Park for Bearpark – think about a park you know well. What facilities does it have? How do children and adults use it? Design your own park! Think about all the elements needed for the community, and what extra ideas you think would make it extra special. You could draw a diagram and label it.

Design your own wordsearch – About Japan. Or a topic of your choice! You could include key words about Japan that you have learnt from your research, such as Kyoto, Mount Fuji and kimono.

Design your own planet – Look at the materials on this site: <https://www.literacyshed.com/the-sci---fi-shed.html> Design your own planet, with information about alien animals, plants and settings.

Computing:

Write a story about ANYTHING. Free choice!

Either on Microsoft Word on a computer, or in Notes on an iPad. You could *change fonts* for different paragraphs, use **bold** and *italics* to emphasise important words or phrases, and include a page border.

If you're feeling brave, use Microsoft Powerpoint on a computer, or Keynote on an iPad, to split the story into different sections, where each slide is a different paragraph. Play about with the fonts, colours and background to suit the 'mood' of the paragraph. For example, if it's a scary section, you could have white text on a dark background.

Have a lovely week and enjoy the holiday!
